AS-960 THE ADDRESSING SOLUTION THAT DELIVERS

High-Performance Tabletop Addressing, Barcoding
and Graphics Solutions

WE VALUE YOUR MAIL

AS-960

SAVE MONEY AND INCREASE RESPONSE RATES

It's the high-speed, heavy-duty professional tabletop address and barcode printer built with HP inkjet technology. The AS-960 allows your organization to print crisp, professional messages which get noticed and opened, including addresses, return addresses, the latest USPS® barcodes, such as the Intelligent Mail® barcode, and personalized messages. You can even include your company logo – all in one pass, and with six fixed print heads, you can print absolutely anywhere on your mailpiece, even with flats. This powerhouse moves with speeds of up to 26,000 envelopes per hour.

EASE OF USE

All of the programming functions of the AS-960 are controlled by Satori Bulk Mailer software, eliminating the cumbersome operation that casual operators are faced with. You can easily select new jobs and run them with ease. Our software provides an intuitive print dashboard interface, offering instant feedback about the status of the various print jobs.

IMAGE IS EVERYTHING

Our patented HP printing technology produces true 600x600 dots per inch printed images. This means sharp, crisp, more easily readable addresses and professional appearance, with a print area of up to 3 inches. With the AS-960, you get a clear, consistent, machine-readable barcode that allows your document to fly through the Postal Service reading systems, increasing your productivity. It even lowers your printing costs.

Print on items up to 3/8" thick or as large as 15" x 20".

Neopost CASS™ compliant address quality management software certifies your mail for USPS® discounts and reduces your rate of returns.
